

Be a Boxitect!

How does Meg turn completely ordinary boxes into extraordinary things? All it takes is imagination! Here are two projects to get you started on your way to designing and building your own creations.

Supplies

- At least 3 large cardboard boxes. The more boxes you have, the longer your tunnel will be.
- Duct tape
- Craft knife and/or scissors (Ask an adult for help with the cutting!)
- Paint, markers, stickers, etc.

Build a Boxitect Tunnel:

1. Open up both ends of each box.

2. Line up boxes in a row with flaps slightly overlapping.

3. Tape the boxes together with duct tape.

4. Cut out any windows and doors you want.

5. Decorate your new tunnel!

Boxitect Challenge: Make your tunnel unique! Try a door made of streamers, using a string of lights, or even adding a cardboard periscope! If you have a lot of boxes, try making a tunnel maze!
